

INDEXING CONVEYOR

Digital Control	Compact Footprint	Easy Change Over
Auto Config	Variable Cycle Time	Servo Actuated
Low Power Consumption	Pneumatic-Servo Clamping	Long Life

ABOUT

Gridbots Indexing Conveyor are suitable for precise positioning of workpieces while working with robotic systems

The system can be used for machining, tray filling - assembly operations etc.

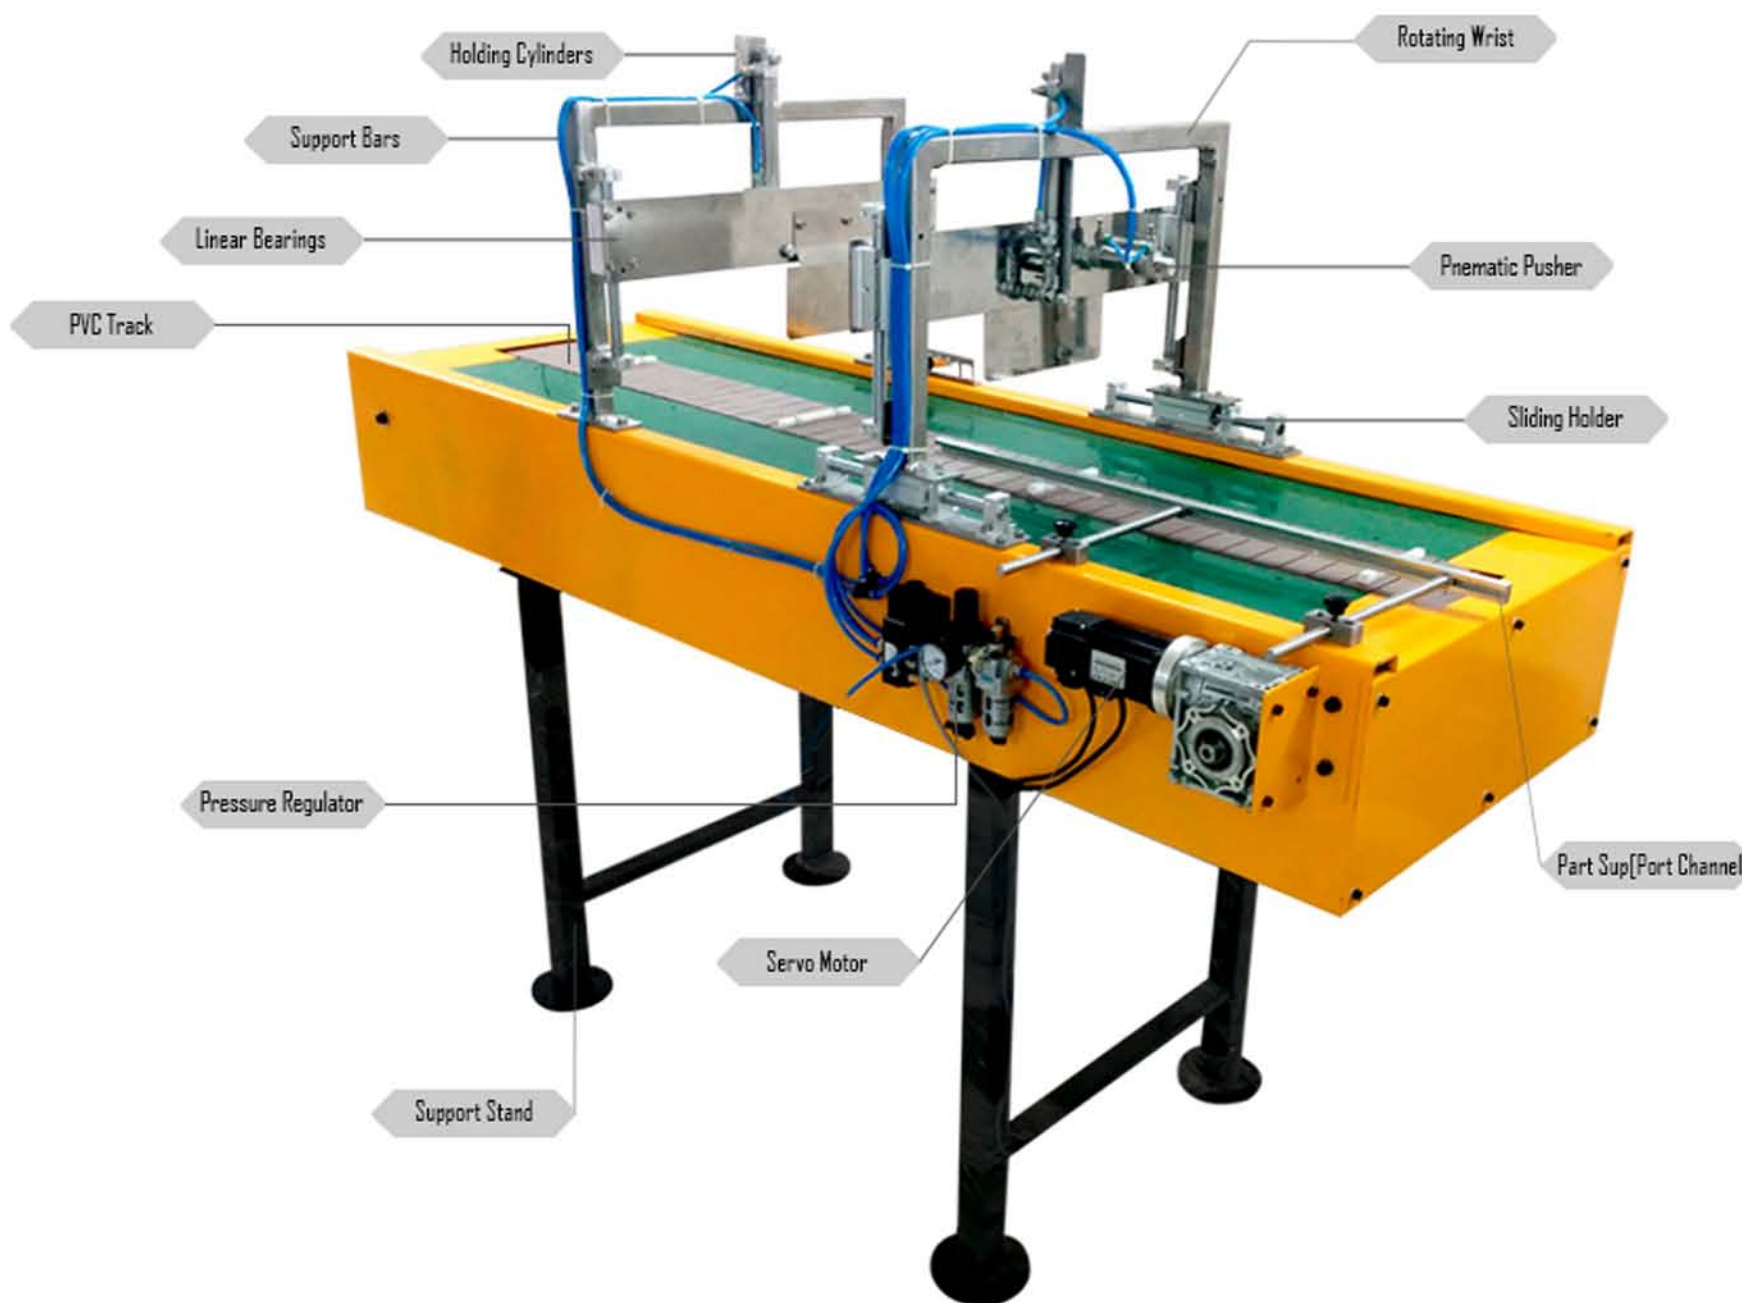

Multiple motion profiles ranging from Trapezoidal to S-Curve Motion profile can be selected as per user needs.

The system can be interface with multiple types of Robotic systems - PLC's or manual controls

SPECIFICATIONS

Model Number	GB-IC
Length	Upto 3000 mm
Width	Upto 1000 mm
Profile	30 mm High
Indexing accuracy	±1 mm
Power Consumption	500 Watts
Payload	Upto 50 Kg
Drive	AC Servo
